DECENTRALIZED MEME TOKEN

TheMetaInu Token | Symbol : METAI

MEME Revolution

Website : https://themetainu.com/

Fully Decentralized, Zero-Emission and Fairly Distributed Community-Driven token disrupting the meme economy aiming at protecting the environment.
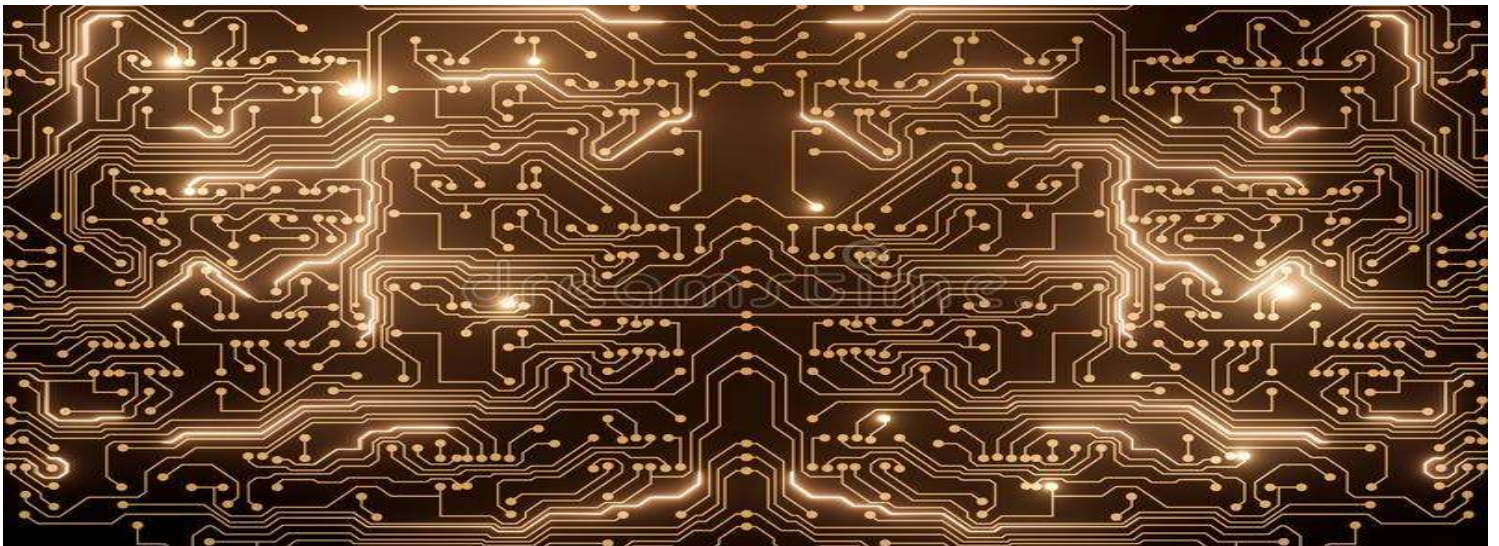

TABLE OF CONTENTS

ABSTRACT

2021 has brought the largest bull run in cryptocurrency history, launching countless cryptocurrencies sky-high. The noise made by the price rallies attracted new investors, new developers, and more capital to crypto than ever before, taking the total cryptocurrency market cap into the trillions.

With the increased attention being paid to the cryptocurrency sector, the development of new projects exploded. Among the new trends that emerged, one area of development made the biggest splash - meme tokens. While the number of new dog-based meme tokens skyrocketed, it became clear there was very little difference between them. None displayed a true use case, and the extent of token differentiation seemed to begin and end at the percentage of distribution. Until now, no dog meme coin has offered a true utility or value proposition that puts it head and shoulders above the rest.

Enter TheMetaInu — the one-of-a-kind community-driven project aiming to be far more than just a meme token. Instead, TheMetaInu aspires to become the first ever decentralized meme token ecosystem with a native, decentralized community token - METAI.

VALUES

Transparency

TheMetaInu also aims at being fully transparent, fully community-driven, and completely trustworthy. We believe that this approach is the key for longevity - not only for TheMetaInu but also the entire Inu family.

Longevity

TheMetaInu has a noble ambition - to be more than just a passing cryptocurrency project that will disappear in a few months, never to be heard from again. Our goal is to be here for the long run to watch the crypto sphere grow, mature, become adopted, and eventually take over the world of finance. We hope to be more than casual observers, however. TheMetaInu has the potential to be nothing short of the powerhouse for all meme tokens in crypto. As such, our team of highly experienced developers are constantly establishing new use cases, reformulating existing ones, and establishing key partnerships with token and their communities throughout the meme coin space. All the while, the community will continue to flourish, earn, and reap the full extent of what the crypto, and DeFi industry in particular, have to offer.

Trust

Trust is mission critical to the long term success of TheMetaInu. As such, we acknowledge that security will play an integral role in our success..

Community

From its genesis, TheMetaInu has been a decentralized project led by the community. Even though the developer team has set the initial course for the project, TheMetaInu community members will play an integral role in shaping the token's future journey.

PRODUCT

TheMetaInu is a fully decentralized, zero-emission and fairly distributed community-driven token disrupting the meme economy aiming at protecting the environment.

TheMetaInu is here to become an ecosystem for the entire dog/memetoken family and all tokens that it contains. To that extent, we are building a number of products that will give memecoins a purpose. Their communities will have a reason to come to us and be rewarded in a number of different ways for simply owning their tokens.

ECOSYSTEM

The goal of the TheMetaInu ecosystem is to create a new, modern, and state-of-the-art platform dedicated solely to the growth of meme tokens. With the critical role that meme tokens have played thus far in the bull run (and likely ones to follow), the community has decided to pursue multiple product offerings, including:

TheMetaInu is a token on the Binance Smart Chain which aims at setting up a Carbon Neutral Economy, with a sustainable crypto development, thus reducing the emissions and the subsequent carbon footprint that stems from mining.

TOKENOMICS

Total Supply

1000 trillion

Token Burn

500 trillion

50% Of Total Supply is BURN to keep our prices stable.

Continuous Burn

50 trillion tokens will burn each month till the supply doesn't come under 100 trillion

Maximum Supply

100 trillion (6% Of the Supply is locked to PancakeSwap)

Marketing, Promotion & Development Fund

10% of token will be used for Marketing, Promotion & Development Fund.

Out of 10%, 4% will be used as Marketing & Promotion.

6% will be used as development fund.

ROADMAP

Q1

2,000 Holders | AirDrop |50% token burn | Website Launch | Pancakeswap Listing | CoinMarketCap Listing | 1000 Telegram Members | Marketing and Promotional Campaign

Q2

5,000 Telegram Members| 6 trillion token burn | Launch Android App for TheMetaInu Web | Website Revamp | 5,000 Holders | Initial CEX | Listings (Bitmart, Bilaxy, CoinTiger, and BiTrue) | Marketing promotions | Community Charity Event | Large Exchange Listing

Q3

10,000 Holders | 15 trillion token burns | Initiate Listings in Coinbase & CoinGecko | Marketing/ads Campaigns | YouTube Promotions | Billboard Advertisement | Website Revamp 2.0 | Community Charity Event

Q4

20,000 Holders | 15 trillion token burn | NFT Launch |Swap Improvement according to Demand | Launching of wallets for IOS and Android for TheMetaInuSwap and other stuffs | Creating NFTs on our swap and can swap NFTs as well | Wallet more chains introduction depending upon requirement | Marketing Expansion.

THANKYOU
